

Requirement Clarification

- * How many entrances?

→ 1 entrance
→ 1 exit

but our code should be scalable.

- * Different Types of Spot
 - Two wheeler
 - Four wheeler

but our code should be extensible

- 3wheeler
- Heavy Utility (etc.)

* Payment

Hourly based / Minute based

let's say it's mix,
for some parking spot
it's hourly,
for some, it's mix.

→ Nearest Parking Spot

→ Floors? No
but we should
be able to access

Approaches.

↳ Top Down [Entrance, (start, end)]
 ↳ Bottom Up [Small modules, combining]

Bottom Up Approach

Bottom Up Approach
What's the basic thing?
Parking Spot.
